## “WE SIMPLY LOVE SEPARATING”

### SEPARATE TO YOUR HEART'S CONTENT.

HERMLE centrifuges have established themselves as indispensable tools for DNA analysis, drug development in the pharmaceutical industry and even standard blood tests at your GP's surgery. We are also well and truly “at home” in the fields of microbiology, environmental technology and food technology.

Our passion is separating, which is why we focus exclusively on building outstanding centrifuges. Our range of standard products now covers a wide range of volumes and speeds, both with and without integral cooling. However, we can also develop custom solutions to meet the needs of your individual assignments.

OUR HEARTS BEAT FASTER IN THE KNOWLEDGE THAT YOU CAN SUCCESSFULLY SEPARATE SUBSTANCES INTO THEIR INDIVIDUAL COMPONENTS – WE ARE ALWAYS FULLY COMMITTED TO ACHIEVING THIS GOAL.

Centrifuges from HERMLE are assembled exclusively in Germany by qualified specialists in the fields of electronics and mechanics. At HERMLE, we attach particular importance to this expert craftsmanship – and to ensuring a positive working atmosphere, optimal workstations and good teamwork.

*Did you know that the first centrifuge was invented and built by Wilhelm Lefeldt in Germany, and that it has revolutionised milk processing to this day by enabling automatic separation of the cream from the skimmed milk?*

*For over 60 years, HERMLE centrifuges have embodied “Made in Germany” quality in applications all over the world. And in incredibly diverse fields – from clinical-chemical investigations in medicine and forensics using our universal centrifuges, to environmental investigations of soil material or the water content of crude oil with our large-volume centrifuges, not to mention the production of vaccines, enzymes or vitamins with our special centrifuges for pharmaceuticals and biotechnology.*

# CENTRIFUGES FOR THE LABORATORY

“WE'VE HAD A SPECIAL APPRECIATION FOR HIGH-QUALITY CRAFTSMANSHIP SINCE 1956.”

HARALD HERMLE, SHAREHOLDER

## HERMLE MAKES SEPARATING EASY

We have the right centrifuge and the optimal rotor and accessories for every requirement and application. And if our standard products are not ideal for your task, we will work with you to develop new solutions. Furthermore, thanks their appealing design and intuitive control panels, our devices can be easily used by everyone and anyone.

We've also make it easier than ever to change the rotor in our centrifuges. The technology we use here has been available in our cars for many years – when touched, the car unlocks itself, the seat glides into the stored position for the respective driver and the ambient lighting is activated. Centrifuges from HERMLE offer you this same convenience thanks to built-in RFID rotor identification system. The centrifuge automatically detects the inserted rotor and adjusts the volume and acceleration values accordingly. As well as being extremely convenient for the operator, it also reduces operator error and increases the service life of the device.

WE SUPPORT YOU THROUGHOUT THE ENTIRE SERVICE LIFE OF YOUR CENTRIFUGE TO ENSURE TROUBLE-FREE SEPARATING – GUARANTEED

HERMLE is renowned for being a reliable and long-term partner to our customers. While our dealers appreciate our expert help via our hotline, our end customers value our fast delivery times and deep stocks of spare parts – even for older devices. In addition, most of the accessories for our devices can also be used with their successor models.

# QUALITY IS NO COINCIDENCE

## WE LOVE TO SEPARATE – WHICH IS WHY WE KEEP A CLOSE EYE ON OUR CENTRIFUGES

---

*Carefully selected components and materials, coupled with our employees' sense of responsibility and keen know-how, as well as an internally focused quality management system – this is how we ensure the quality, reliability and safety of our equipment.*

---

Of course, there can be no doubt that all manufacturers of laboratory equipment base their operations on a functional and certified quality management system.

At HERMLE, quality begins with the selection of our employees. Their qualifications naturally play a major role on the one hand. On the other, we endeavour to establish harmonious teams in order to create a positive working atmosphere, in which we can all learn from each other and ensure that mistakes are kept to an absolute minimum. We will therefore retain important core areas such as development and production in Germany, and will carry out the necessary quality and safety checks in-house.

In addition, our corporate culture is based on the principle that everyone is responsible for the quality of their own work. This ensures that we work and act with a constant awareness of both quality and cost. Furthermore, we contribute to our high quality standards by providing permanent and intensive training for our employees.

Careful selection of suppliers, components and materials is also firmly anchored in our quality awareness. Our goal is to ensure that you receive a high-quality device that complies with certified quality and safety standards – and will remain in perfect working order for many years to come.

Naturally, we work in accordance with a highly effective, company-focused quality management system based on ISO 9001 and ISO 13485. This ensures we achieve the defined quality level and guarantees the extreme reliability of our products across the board. In addition, our centrifuges comply with all applicable EC directives.

We work and act with a high awareness of quality.

# THIS IS HOW WE ENSURE PROPER SEPARATION

*All core areas of production are housed under one roof: development, assembly and quality control – to ensure proper separation of your substances and samples.*

# IF YOU WANT TO KNOW EXACTLY ...

## A CAMPAIGN THAT EMBODIES OUR QUALITY STANDARDS.

You're no doubt asking yourself why on earth we're alluding to Black Forest gâteau. This is one of our newly developed campaign motifs. It's our tongue-in-cheek way of explaining our passion for separating. The campaign is not only designed to illustrate what our centrifuges do, namely separate substances with outstanding precision, but also how we build them – with commitment to quality and precise results, but always also with a healthy dose of humour. Indeed, this perfectly summarises our daily work at our location in Wehingen, Germany. We firmly believe that a friendly, open work environment simply results in superior products and higher quality.

We constantly strive to improve our centrifuges, including their operation and the handling of the required accessories, and to make the procurement of new devices and spare parts as quick and easy as possible for our dealers and end customers. After all, when you purchase a HERMLE centrifuge you are entitled to expect excellent after-sales service as part of our quality promise.

SO LET US SURPRISE YOU BY SHOWING YOU WHAT  
ELSE WE CAN SEPARATE (APART FROM A BLACK  
FOREST GATEAU!).

We've also “declared war” on overly technical, cold and sterile catalogues and product presentations by showing that we have the courage to innovate here also – just as we do when developing our products and responding to your custom requests. For us, “courage to innovate” means producing fresh designs combined with intuitive operation of our devices and accessories.

## SMALL CENTRIFUGES 8 x 15 ml Z 207 A

The small centrifuge Z 207 A is ideal for use in medical practices and laboratories that process a small number of samples. It includes a fixed-angle rotor that can hold up to 8 x 15 ml tubes as well as the most common blood-collection tubes. The innovative control panel with touch function is particularly easy to use and unique in this centrifuge class.

Information about the control panel can be found on page 46.

### TECHNICAL SPECIFICATIONS

MAX. SPEED	6,800 rpm
MAX. RCF	4,445 xg
MAX. VOLUME	8 x 15 ml RB / 4 x 15 ml conical
SPEED RANGE	200 – 6,800 rpm
RUNNING TIME	59 min 50 s / 10 s increments or 99 h 59 min / 1 min increments
DIMENSIONS (W X H X D)	28 cm x 24 cm x 35 cm
WEIGHT	8 kg
POWER CONSUMPTION	50 W

### ORDER NUMBERS

326.00 P01 – Z 207 A, 100 – 230 V / 50 – 60 Hz, incl. 8 x 15 ml Rotor

### SPECIFICATIONS

- Microprocessor control with LCD display
- Electromagnetic lid lock
- Quick access to the samples
- Active imbalance detection and shutdown
- Air cooling
- Short acceleration and deceleration times
- Noise level < 60 dBA at max. speed
- Easy removal of the rotor – without tools
- Manufactured in accordance with international safety guidelines, e.g. IEC 61010
- Colour-based visual display of the operating state
- Sleep mode

If you cannot find the required adapter, we will gladly make a custom adapter for you.

## SMALL CENTRIFUGES

### 24 x Capillaries

# Z 207 H

Due to its compact design, the hematocrit centrifuge Z 207 H can also be used in even the smallest laboratories. It is equipped with a hematocrit rotor for 24 x capillaries. The innovative control panel with touch function is a particular highlight.

Information about the control panel can be found on page 46.

## MICROLITRE CENTRIFUGES

### 12 x 1.5/2.0 ml

# Z 130 M

Unlike with conventional mini centrifuges, there is no need to replace the rotors with the Z 130 M. The unique COMBI-Rotor included in the centrifuge is all you need to centrifuge 12 micro tubes and 4 PCR strips simultaneously. With a fixed speed of 5,500 rpm, this centrifuge is ideal for short centrifugation runs.

COMBI-Rotor

### TECHNICAL SPECIFICATIONS

MAX. SPEED	5,500 rpm
MAX. RCF	2,000 xg
MAX. VOLUME	12 x 1.5/2.0 ml tubes 32 x 0.2 ml PCR tubes 4 x PCR strips (8 x 0.2 ml)
DIMENSIONS (W X H X D)	14 cm x 11.2 cm x 20 cm
WEIGHT	1.3 kg

### ORDER NUMBERS

- 324.00 V01 – Z 130 M, 230 V / 50 – 60 Hz / 40 W
- 324.00 V02 – Z 130 M, 120 V / 50 – 60 Hz / 40 W

### SPECIFICATIONS

- Unique COMBI-Rotor for both tubes and strips
- Double the capacity of a standard mini centrifuge
- Starts/stops when the lid is opened/closed
- Compact design
- Short acceleration and deceleration times
- Low noise level: 52 dBA
- Built in accordance with international safety guidelines, e.g. IEC 61010

Our laboratory centrifuges let you efficiently process large quantities of samples – with all common tube types via the appropriate accessories.

## MICROLITRE CENTRIFUGES

### 18 x 1.5/2.0 ml

# Z 167 M

The microlitre centrifuge Z 167 M is ideally suited for routine centrifugation of reaction tubes. Equipped with a powerful drive, it accelerates the 18 x 1.5 / 2.0 ml rotor to around 16,000 xg in a very short time! The innovative control panel with touch function and integrated LED light enables a quick and easy workflow. The LED changes colour depending on the current operating state of the centrifuge, making it easy to see at a glance whether the centrifuge is running, stationary or in sleep mode.

Information about the control panel can be found on page 46.

## MICROLITRE CENTRIFUGES

44 x 1.5/2.0 ml

# Z 216 M | Z 216 MK

The Z 216 M and Z 216 MK set new standards in this device class. Up to 44 x 1.5 ml or 2.0 ml reaction tubes can be inserted per run. Their compact design and quiet running characteristics ensure they can be optimally adapted to the respective work environment. The powerful cooling system of the Z 216 MK keeps the samples below 4°C – even during continuous operation at 20,000 xg.

Information about the control panel can be found on page 46.

## UNIVERSAL CENTRIFUGES

4 x 145 ml

# Z 306

Our small, universal laboratory centrifuge offers a wide range of applications, ranging from clinical laboratory work to research and industrial laboratories. The swing-out rotors can accommodate all standard tubes via appropriate adapters, including blood collection tubes and conical 15/50 ml tubes. The wide range of accessories for the Z 306 includes rotors for microtitre plates as well as high-speed fixed-angle rotors for reaction tubes or centrifuge tubes up to 50 ml – making this laboratory centrifuge an indispensable part of the daily work routine at smaller hospitals.

### TECHNICAL SPECIFICATIONS

# Z 326 | Z 326 K

Both the tabletop centrifuge Z 326 and the tabletop refrigerated centrifuge Z 326 K are compatible with a wide range of different rotors and can therefore be classified as universal centrifuges. Whether with a swing-out, microlitre or large-volume fixed-angle rotor, the easy rotor replacement makes the separation process fast and efficient. Featuring a space-saving design, the Z 326 K is equipped with a powerful cooling system and delivers outstanding performance with a compact footprint.

# Z 366 | Z 366 K

The tabletop centrifuges Z 366 and Z 366 K set new standards in terms of versatility, running characteristics, user-friendliness and design. A capacity of 40 x 15 ml conical tubes combined with centrifugal accelerations of up to 24,325 xg ensure these tabletop devices can be classed as universal high-performance centrifuges.

4 x 1,000 ml

# ZK 496

The refrigerated centrifuges of the ZK 496 series can process large volumes of up to max. 4 x 1,000 ml as well as blood bags. As is typical for HERMLE, a wide range of adapters is available. The units are available in two different working heights: a floor-standing centrifuge and a practical underbench unit. Both models are fitted with castors to ensure they can be easily moved around the lab.

Information about the control panel can be found on page 46.

### TECHNICAL SPECIFICATIONS

MAX. SPEED	10,500 rpm
MAX. RCF	16,022 xg
MAX. VOLUME	4 x 1,000 ml
SPEED RANGE	200 – 10,500 rpm
TEMPERATURE RANGE	-20°C to 40°C
RUNNING TIME	59 min 50s / 10s increments or 99h 59min / 1 min increments
DIMENSIONS (W X H X D)	Underbench centrifuge: 62 cm x 70 cm x 69 cm Floor-standing centrifuge: 62 cm x 98 cm x 69 cm
WEIGHT	Underbench centrifuge: 157 kg Floor-standing centrifuge: 190 kg
POWER CONSUMPTION	2.3 KW

### ORDER NUMBERS

Underbench centrifuge:	313.00 V01 – ZK 496, 230 V / 50 – 60 Hz
Floor-standing centrifuge:	313.00 V02 – ZK 496, 230 V / 50 – 60 Hz
Interface including operating software:	800.001

### SPECIFICATIONS

- Maintenance-free induction drive
- Microprocessor control with LCD display
- Motor driven lid lock
- Automatic radio-frequency rotor identification system (RFID) with over speed protection, immediately upon rotor insertion
- Active imbalance detection and shutdown (rotor-specific)
- Wide range of rotors and accessories
- CFC-free refrigeration
- Manufactured in accordance with international safety guidelines, e.g. IEC 61010
- Acoustic signal during operation – with adjustable melody and volume
- Stainless steel chamber
- Timer function: the centrifuge starts at the pre-set time

Max. volume: 4 x 500 ml  
Order number: 221.51 V20

Max. volume: 6 x 250 ml  
Order number: 221.21 V20

The respective max. capacities of the rotors are shown in the tables. Naturally, adapters are available for smaller volumes. Detailed information can be found in our individual brochures on our homepage: [www.HERMLE-labortechnik.de/download](http://www.HERMLE-labortechnik.de/download)

If you cannot find the required adapter, we will gladly make a custom adapter for you.

Our technicians have the best view in every situation.

We and our partners will be happy to assist you in choosing the model that best suits your needs.

## HIGH-SPEED CENTRIFUGES

4 x 145 ml

# Z 32 HK

Thanks to a wide range of accessories, the Z 32 HK high-speed refrigerated centrifuge is suitable for a wide range of applications. Thanks to its small footprint, the Z 32 HK can be used to achieve high centrifugal accelerations directly at the respective workstation – even with larger volumes. A powerful cooling system keeps the sample material cool, even at maximum speeds.

Information about the control panel can be found on page 46.

## HIGH-SPEED CENTRIFUGES

6 x 250 ml

# Z 36 HK

This refrigerated centrifuge is the culmination of HERMLE's many years of experience in producing high-speed, tabletop devices. High speeds and centrifugal accelerations are possible in this centrifuge – combined with large volumes and a wide variety of tubes. A clearly designed control panel enables easy parameter changes.

Information about the control panel can be found on page 46.

## OIL-TEST CENTRIFUGE 4 x 100 ml **OLEUM**

The OLEUM centrifuge is a compact tabletop device that is used for petroleum testing. During this process, the water content in the mineral oil is examined. The OLEUM features a 4-place swing-out rotor that can accommodate conical and pear-shaped ASTM tubes.

Information about the control panel can be found on page 46.

### TECHNICAL SPECIFICATIONS

MAX. SPEED	3,000 rpm
MAX. RCF	2,213 xg
MAX. VOLUME	4 x 100 ml
SPEED RANGE	200 – 3,000 rpm
RUNNING TIME	59 min 50 s / 10 s increments or 99 h 59 min / 1 min increments
DIMENSIONS (W X H X D)	56 cm x 41 cm x 64 cm
WEIGHT	72 kg

### ORDER NUMBERS

314.00 V03 – OLEUM, 230 V / 50 – 60 Hz / 950 W

### SPECIFICATIONS

- Maintenance-free induction motor
- Microprocessor control with LCD display
- Motor driven lid lock
- Active imbalance detection and shutdown
- Noise level < 55 dBA at max. speed
- Acoustic signal at the end of the running time
- Manufactured in accordance with international safety guidelines, e.g. IEC 61010
- Stainless steel chamber
- Timer function: the centrifuge starts at the pre-set time

### ROTORS

Order number: 221.40 V20

Swing-out rotor 4 x 100 ml

MAX. SPEED: 3,000 rpm  
Max. RCF: 2,213 xg  
Max. Radius: 22 cm

## FILTRATION CENTRIFUGE 500 ml **SIEVA-3**

The SIEVA-3 is a filtration centrifuge with microprocessor control. Via an opening in the lid, the liquid can be filled into the centrifugal basket while the device is running. The solid substances remain stuck in the centrifugal basket, while the liquid can escape through an opening on the right side. The device's transparent lid allows visual monitoring of the centrifugation process. The SIEVA-3 is highly versatile and suitable for diverse applications.

Information about the control panel can be found on page 46.

### TECHNICAL SPECIFICATIONS

## HERMLE CONTROLLER

# INFORMATION

The HERMLE control panel has been designed to meet the needs of laboratory workers and is characterised by extreme ease of use. The splash-proof control panels allow quick and easy operation – even when wearing gloves. The parameters are selected by pressing the corresponding function key. The desired values can then be set using the rotary knob or the control field. The clearly arranged display permanently shows the setpoint and actual value as well as additional information to assist operation. The integrated diagnostic program makes it possible to retrieve error messages and view the number of starts and operating hours of the centrifuge, among other information.

### KEY AND DISPLAY FUNCTIONS

#### KEYS

-  = Starts the centrifugation process
-  = Stops the centrifugation process
-  = Opens the lid after the centrifuge has stopped
-  = Program key to select the RUNNING TIME
-  = Program key to retrieve stored programs  
99 programs can be stored in the program memory
-  = Program key to save 99 runs
-  = Quick key for short runs
-  = Program key to select the acceleration/deceleration level,  
10 levels selectable
-  = Program key to select the speed or RCF
-  = Program key to select the temperature from -20°C to 40°C (refrigerated devices only)
-  = “Precooling” – for precooling of centrifuge and rotor (refrigerated devices only)
-  = Rotary knob to adjust the values
-  = Control field to adjust the values

#### DISPLAYFUNCTION

- rpm/rcf = Permanent display of setpoint and actual speed/RCF
- acc/dec = Display of the acceleration/deceleration level
- temp = Temperature display for refrigerated appliances
- time = Display of the centrifugation duration

For over 60 years, HERMLE centrifuges have embodied “Made in Germany” quality in applications all over the world.
